### **DETAILED ACTION**

Amendment filed on April 18, 2007 has been acknowledged. Claims 1-6 and 13 are pending.

#### ***Response to Amendment***

Rejection of Claims 1-6 and 13 as being anticipated by Peckles (US 5255819) has been withdrawn in light of applicant's amendments.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 and 13 are rejected under 35 U.S.C. 102(b) as being by Lee (US 6702894).

Lee teaches a fluid ejection cartridge/liquid discharge means for discharging sample onto a substrate and identification holding means/flexible circuit (125) for holding, in a readable manner, identification information for identifying the liquid. The fluid ejection cartridge/inkjet head (102) comprises a tank/fluid reservoir (128) for storing the liquid and a head chip/nozzle layer (126) and nozzles (124) for discharging the liquid stored in the tank (128). The information holding means has a configuration that is capable of transmitting electromagnetic waves for indicating the identification information to be held. The information holding means further comprises a storage section/information storage element/memory chip (133) for storing the identification

information, a transmission section/outputting information for transmitting the identification information, a control section for reading the identification information stored in the storage section a storage section/information storage element/memory chip (133) and transmitting the identification information via the transmission section. (See Col. 5, Lines 60-68 to Col. 6, Lines 1-5) The information holding means (125) is constructed so as to be capable of updating the identification information. (See Figure 1a) Lee further teaches an array (102,103) of fluid ejection cartridges.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-6 and 13 have been considered but are moot in view of the new ground(s) of rejection. Refer above.
